

EcoVeil® widths changing

Due to changes in the looms used to weave EcoVeil shade cloths, all usable widths are changing. This is to be effective immediately.

Please take note of the following size changes:

The McDonough Iceland Collection®

8065, 8070, 8075, and 8150 series
Former width: 64–66 in. (163–168cm)
Current width: 72 in. (183cm)

EcoVeil Naturals

8050 series
Former width: 64–66 in. (163–168cm)
Current width: 72 in. (183cm)

EcoVeil Screens

0950, 1350, and 1550 series
Former width: 100 in. (254cm)
Current width: 63 and 96 in. (160 and 244cm)

Technology has advanced since EcoVeil was first manufactured, and we're proud to say the product has benefited. In addition to usable size changes, you will notice that the shade cloth has a distinctly softer hand, and, therefore, a softer look. The materials used have not changed—the way the textile is processed has simply improved.

The Cradle to Cradle Certified^{CM} Silver shade cloth can still contribute to a LEED® point. It can also still be used with Mecho®/5 and manual UrbanShade® for complete, Cradle to Cradle Certified Silver shade systems, which can also contribute to earning a LEED point.

Cradle to Cradle Certified is a certification mark licensed by the Cradle to Cradle Products Innovation Institute.
