

## We're at Greenbuild® 2009 in sunny Arizona.

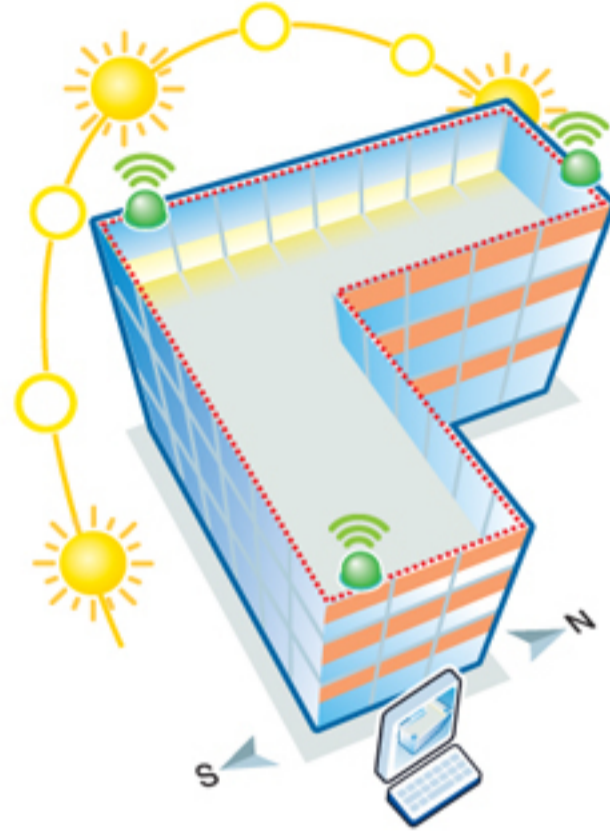

### USGBC chooses SolarTrac® for its new headquarters.

The SolarTrac® automated shade system raises and lowers shades, according to the sun's location and real-time sky conditions, to provide:

- natural daylight and comfort for building occupants.
- a view to the outside.
- significantly lessened heat gain and glare.
- appreciably reduced energy costs of artificial lighting and HVAC.

Add these ingredients: (1) an energy-efficient building, (2) a scientifically based solar-tracking program, (3) roof-mounted radiometers, and (4) a state-of-the-art shade cloth.

And you get: SolarTrac®.

## EcoVeil® is at the USGBC.

### The EcoVeil® Screens and Naturals are now available.

EcoVeil® Screens shade cloth, a component of the SolarTrac® system in USGBC's new headquarters, is Cradle to Cradle Certified<sup>CM</sup> silver and GREENGUARD® certified. All EcoVeil® shade cloths are PVC-free, washable, antifungal, and UV-resistant.

The eco-friendly family includes:

- EcoVeil® Screens—a basket-weave pattern in eight colors, from 1% to 5% open
- EcoVeil® Naturals—a jacquard weave in eight colors, 2% open
