

ShadeLoc® System

Unflappable.

The ShadeLoc is a specialized side-channel assembly that captures the zippered edges of a shade band. It provides solar-shading, room-darkening, or both solutions in one installation.

The zippered shade band glides smoothly but securely within the side channels as it is raised or lowered.

This design configuration eliminates light gaps between the shadecloth and the channel. The design stabilizes the shadecloth and helps the shade bands resist impacts and stay put when room air pressure builds up. Tall, narrow shades will track better, and the need for exposed hardware (such as guide cables) will be minimized.

Key features:

- Shade bands that lock into side and center channels.
- Impact resistance.
- Tall shades that track better.
- No light gaps.
- Superior room darkening.
- Single and DoubleShade® center channels for multibanding.
- Low future maintenance costs.
- Concealed fasteners.
- Surface or jamb mounting.
- Available with Electro®/2 (shown) and Electro®/1 brackets.

Bracket options	Shadecloth options*	Max. width	Max. height
Electro/1 and Electro/2 (3.5 in./89mm tube)	0700 Series	16.5 ft. (5.03m)	13 ft. (3.96m)
	1300 Series	17 ft. (5.18m)	7 ft. (2.13m)
	6000 Series	17 ft. (5.18m)	9 ft. (2.74m)
Electro/2 Extended (3.5 in./89mm tube)	0700 Series	16 ft. (4.88m)	26 ft. (7.92m)
	1300 Series	16 ft. (4.88m)	22 ft. (6.71m)
	6000 Series	16 ft. (4.88m)	26 ft. (7.92m)
Electro/SL Double (3.5 in./89mm tube)	0700 Series	16 ft. (4.88m)	27 ft. (8.23m)
	1300 Series	17 ft. (5.18m)	12 ft. (3.66m)
	6000 Series	17 ft. (5.18m)	15.5 ft. (4.72m)

*No battens or stiffeners required.
